

MUSEUM STORAGE

Curator Approved Environmental Controls

Museum Storage with Environmental Monitoring & Control

We offer an integrated museum storage and transport solution. Safe reliable transport coupled with an ultra secure underground storage facility that exceeds BSI PD 5454. All at much lower cost than you would think!

Speedstore is a revolutionary new concept that brings secure and reliable environmental monitoring & controlled storage within the budgets of museums.

Space is always at a premium and many items are at risk of disposal as funds are tightened. Now even the lower value precious artefacts can be stored safely at very cost effective rates.

Dedicated museum storage and moving companies exist that offer a fantastic bespoke service but at greatly increased pricing. Many items don't need to be handled in such a way. It isn't every day you need to store a Snettisham hoard. Lower value but important items can now be correctly transported and stored at a secure central location.

PD5454 Compliant Document Storage & Archiving
PD5454 environment storage solutions for artefacts and historical document preservation.

Climate Controlled Storage
Our facility can maintain constant temp & humidity levels, for environmentally sensitive goods.

Online Archive Management Dashboard
Hassle-Free Self-Storage from the comfort of your home or office. Manage everything online.

Nationwide coverage from locations of your choice. We only use the highest quality boxes and packaging.

Express Private & Public Sector Storage
Rapid effective solutions. Next day delivery and same day collection of storage available.

UK's Most Secure Self Storage
Early smoke detection, Water spray-mist, 24hr manned security linked to emergency services and 24hr CCTV.

MUSEUM STORAGE

SpeedPod Storage

SpeedPods are essentially giant safe deposit boxes. Waterproof, Dust Proof and Tamper Proof. They are supplied flat packed and assemble in seconds. No tools required. Pods are also supplied with locks.

- We ship out Speedpods to you along with any packing materials you require.
- You pack the items you wish to store – an inventory can be added in your control panel.
- When you are ready we collect and ship your items to our facility.

Pallet Storage

We also store pallets. This reduces costs but does make packing a little more difficult.

PD5454 Document Storage

PD5454 environment storage solutions for artefacts and historical document preservation

Returns are just as simple – we can get your pallet or pod back to you within 24 – 48hrs.

Our document archive team can even return, fax or email, individual documents

Special Services

If you have specific requirements for very high value rare items we offer dedicated haulage options at very competitive rates.

Storage Standards

Speedstore's unique underground facility is perfect for museum artefact storage. Located in a mineral mine 600 feet below the surface constant temperature and humidity are guaranteed.

Unlike conventional storage sites our distinctive environmental conditions do not rely on machinery or power to provide constant temperature and humidity levels. The subterranean location is naturally dry and impervious to water so pumps are not needed.

- Relative Humidity (RH) constant 50%
- Temperature constant 12.5C
- No ash, moulds, fungus or fibre contaminants
- No light or UV
- Free from insects & vermin
- Dedicated climate controlled zones available
- Geologically stable for at least 70,000 years
